## Summary

---

I am a Full Stack Developer skilled in React, Node.js, and MongoDB, building dynamic and user-friendly web applications. I have experience in API integration, authentication, and payment gateway implementation. Passionate about automation, problem-solving, and modern web technologies. Dedicated to delivering efficient, high-quality solutions and continuously learning new skills.

## Technical Skills

---

**HTML5:** Proficient in creating structured, accessible, and responsive web pages using semantic elements and attributes.

**CSS / Tailwind CSS:** Skilled in applying responsive design principles using Flexbox, Grid, and Tailwind utility classes to enhance UI/UX with transitions and animations.

**JavaScript :** Strong in core concepts, DOM manipulation, and advanced array methods (map(), filter(), reduce()) for dynamic web functionality.

**React.js:** Knowledgeable in developing interactive SPAs using components, props, state, and hooks; experienced in API integration for real-time data.

**Node.js & Express.js:** Understanding of server-side programming (routing, middleware, backend logic) and capable of creating RESTful APIs and integrating databases.

**MongoDB :** Skilled in database design and management with experience in CRUD operations, query optimization, and schema design.

## Soft Skills

---

Team Player, Problem-Solving, Adaptability, Communication, Collaboration

## Projects

---

### Hivictus Frontend Development

- Designed and developed the frontend for Hivictus, an agricultural tech company.
- Implemented a responsive and intuitive UI to enhance user interaction. GitHub Repo (<https://github.com/nehasekhs/Cropzap.git>)

### Hospital Management System (MERN Stack)

- Built a comprehensive hospital management system with a MongoDB backend.
- Features include patient record management, doctor scheduling, and billing automation. GitHub Repo (<https://github.com/nehasekhs/HospitalManagmentSystem.git>)

### YouTube Social Media Dashboard

- Developed a dashboard to analyze and manage YouTube channel performance using API integration.
- Features include real-time analytics, video performance tracking, and engagement insights.
- Integrated YouTube Data API for fetching metrics and user data. GitHub Repo (<https://github.com/nehasekhs/Socialmedia.git>)

## Education

---

<b>Bachelor of Science (BSC) - Information System</b> -Kongu Engineering College CGPA-8.25%	2022-2025
<b>Higher Secondary Certificate (HSC)-</b> A.E.T School (73.67)	2021-2022
<b>Secondary School Leaving Certificate (SSLC)-</b> Vijay Vikas School (88.4)	2019-2020
